

REACHING FOR THE STARS

IMPROVE QUALITY OF TEAM PERFORMANCE

Build a high-performing team.

Achieve a collective mindset about the vital contribution that Quality plays in team and organisational success.

Quality plays a significant role at work today in helping to reduce waste, maximise the use of available resources, getting people to be smarter in their work and achieve a standard that creates a reputation for confidence, zero defects and satisfaction.

Reaching for the Stars is a simple, yet very powerful programme that challenges team members to think about what level of quality is expected of them and how they will deliver on these expectations.

It is true that the very survival of the organisation is determined by its ability to meet the demands and expectations placed upon it by all of its stakeholders.

This highly participative and engaging 1 day workshop provides a step by step approach to achieving star performance within teams, using numerous Quality tools to identify opportunities for improvement.

1 Day course

Comprehensive tools and materials

Can be tailored for your business
